PROJECTS

Amazon Clone

- *Description*: Developed a simple Amazon clone landing page using HTML and CSS. This project involved creating a visually appealing and functional front-end to replicate the look and feel of the Amazon website.
- Deployment: Deployed on GitHub Pages for easy access and demonstration.

Features:

1. Responsive design ensuring compatibility with various devices and screen sizes.
2. Navigation bar mimicking Amazon's layout with search functionality.
3. Product showcase section displaying items with images, prices, and brief descriptions.

SKILLS

Proficient:

- HTML & CSS: Extensive experience in creating responsive and visually appealing web pages.
- Python: Strong expertise in scripting, automation, and web development. Experienced with libraries such as Pandas, NumPy, and Flask.

Intermediate:

- JavaScript: Currently learning and applying JavaScript to enhance web functionality.
- C++: Gaining knowledge in object-oriented programming and system-level programming.

Learning:

- Data Structures and Algorithms (DSA): Actively learning and practicing DSA concepts to improve problem-solving skills and prepare for technical interviews.
